Final Year Engineering Project

CONFIDENTIAL REPORT

This report has been automatically generated using Artificial Intelligence, Machine Learning, Speech Recognition and Natural Language Processing.

Executive Summary

Prediction	scam
Confidence Score	57.7%
Risk Level	Low
Overall AI Verdict	The uploaded audio contains strong indicators of fraudulent or scam-rela

AI Decision Overview

The AI Voice Scam Detection System processes the uploaded audio using Speech Recognition, Natural Language Processing, Keyword Detection and Machine Learning models. The system evaluates suspicious phrases, confidence score, linguistic patterns and semantic meaning before producing the final prediction. The generated confidence score represents the certainty of the AI model based on the trained dataset.

Why AI Predicted This

• OTP request detected.

• Low AI confidence.

AI Recommendations

✓ Never share your OTP.

✓ Do not reveal bank details.

✓ Disconnect the call immediately.

✓ Verify using the official company number.

Security Risk Assessment

AI Prediction	scam
Confidence Score	57.7%
Threat Rating	Low
Risk Category	Low

AI Confidence Meter

57.7% Confidence

Security Observation

The analyzed conversation contains suspicious linguistic patterns, scam-related keywords and behavioral indicators commonly found in fraudulent voice calls. The AI model recommends immediate caution before responding to the caller.

Security Checklist

Speech Recognition	Completed
